

i.ScoopShower

Spray rinsing devices for
dishers & ice-cream scoops

The new **i.ScoopShower** is designed to perfectly clean all types of dishers and ice-cream scoops with a minimum consumption of water.

- **Function:** The water valves at the top and bottom are opened by pressing the disher/scoop on the spherical head. The disher/scoop is always rinsed with fresh water from above and below. Rinsing water runs away immediately. On removing the scoop from the spherical head the water valves are automatically closed again by the water pressure.

- **Less water consumption – greater economic efficiency:** Use of an automatic shut-off valve enables **up to 90% water savings** to be achieved compared to traditional dipper well systems with continuous water flow.

- **Improved cleanliness:** The disher or ice-cream scoop is always rinsed with fresh water from above and from below. Rinsing water runs away immediately.
